FDE workshop / Day 1

Build an AI support agent for Kaapi & Co.

A real workflow you will build together

3-5 November 2026 / 8 PM IST

Kaapi & Co. is a fictional coffee brand

Kaapi's support problem

One incoming email

"My coffee bag arrived torn. I would like a refund."

Recognize the request

What kind of help is needed?

Prepare a useful draft

What can we safely say?

Bring in a person

Who needs to review it?

What an FDE does

Forward Deployed Engineer

Work with the customer.

Understand their process.

Build something useful.

Test it in their workflow.

We will practice that loop with Kaapi support.

Three days. One support agent.

Day 1

Connect the workflow

Email, AI drafts, Sheets and Slack

Day 2

Add knowledge and tools

Company policies, FAQs and order actions

Day 3

Make it dependable

Evals, guardrails, human approval, cost and latency

Cloud APIs throughout the workshop

The Day 1 outcome

A draft for review. A visible record. A human handoff.

Before you build

Laptop + Chrome	Windows or Mac, charger and internet
n8n Cloud	Your active instance or eligible 14-day trial
Gmail + Google Sheets	Accounts you can connect to n8n
Slack	A workspace and a test channel you can post to
Gemini API	Your own key, with a successful API test

Open the setup guide

Claude demo / Gemini follow-along

Open your workshop kit

Download the Gemini workflow

Import it once. Connect your accounts.
Configure each step with the instructor.

github.com/becomefde/fde-support-agent

`day1 / kaapi-day1-gemini.json`

Use fictional data and your own credentials

1. Start with a new email

Send a fresh message

Subject includes [KAAPI-DEMO]

Keep it unread.

Allow the next one-minute poll.

Your new test email

Subject: [KAAPI-DEMO] Fresh refund test

Hi, order KC1042 arrived with a torn bag. I'd like a refund.

Send to the inbox connected to your own Gmail trigger.

Check the input before the AI

388 ms

An empty check can still say "Succeeded"

No trigger output

No email entered the flow.
The AI, Sheet and Slack steps did not run.

First confirm: subject, body and sender are visible.

2. Give the AI a clear job

1 **Classify the email**

refund, delivery, product or other

2 **Draft a reply**

Two or three friendly sentences

3 **Sign the draft**

Team Kaapi

4 **Respect the boundary**

No invented status or refund approval

Use one output format

```
{
"category": "refund",
"draft_reply": "... Team Kaapi"
}
```

Allowed categories

refund

delivery

product

other

Same fields with Claude and Gemini

A useful draft needs boundaries

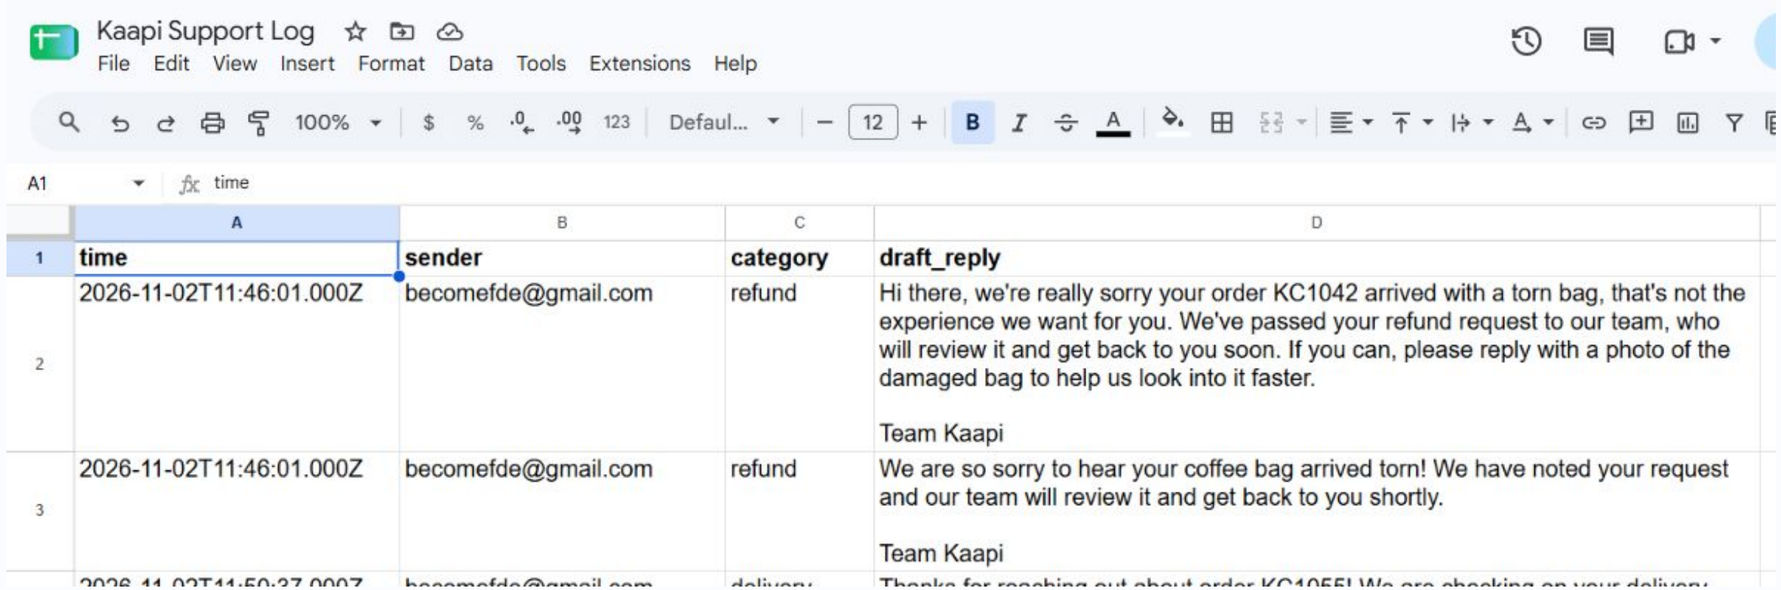

"We've passed your refund request to our team, who will review it and get back to you soon."

Team Kaapi

Acknowledge the issue. Ask for useful details.
Keep refund approval with a person.

3. Save a row in Google Sheets

time | **sender** | **category** | **draft_reply**

Check the original sender, correct category and useful draft.

Earlier verified rows; a fresh test should add a new row.

4. Route refund requests to Slack

```
category == "refund"
```

Yes

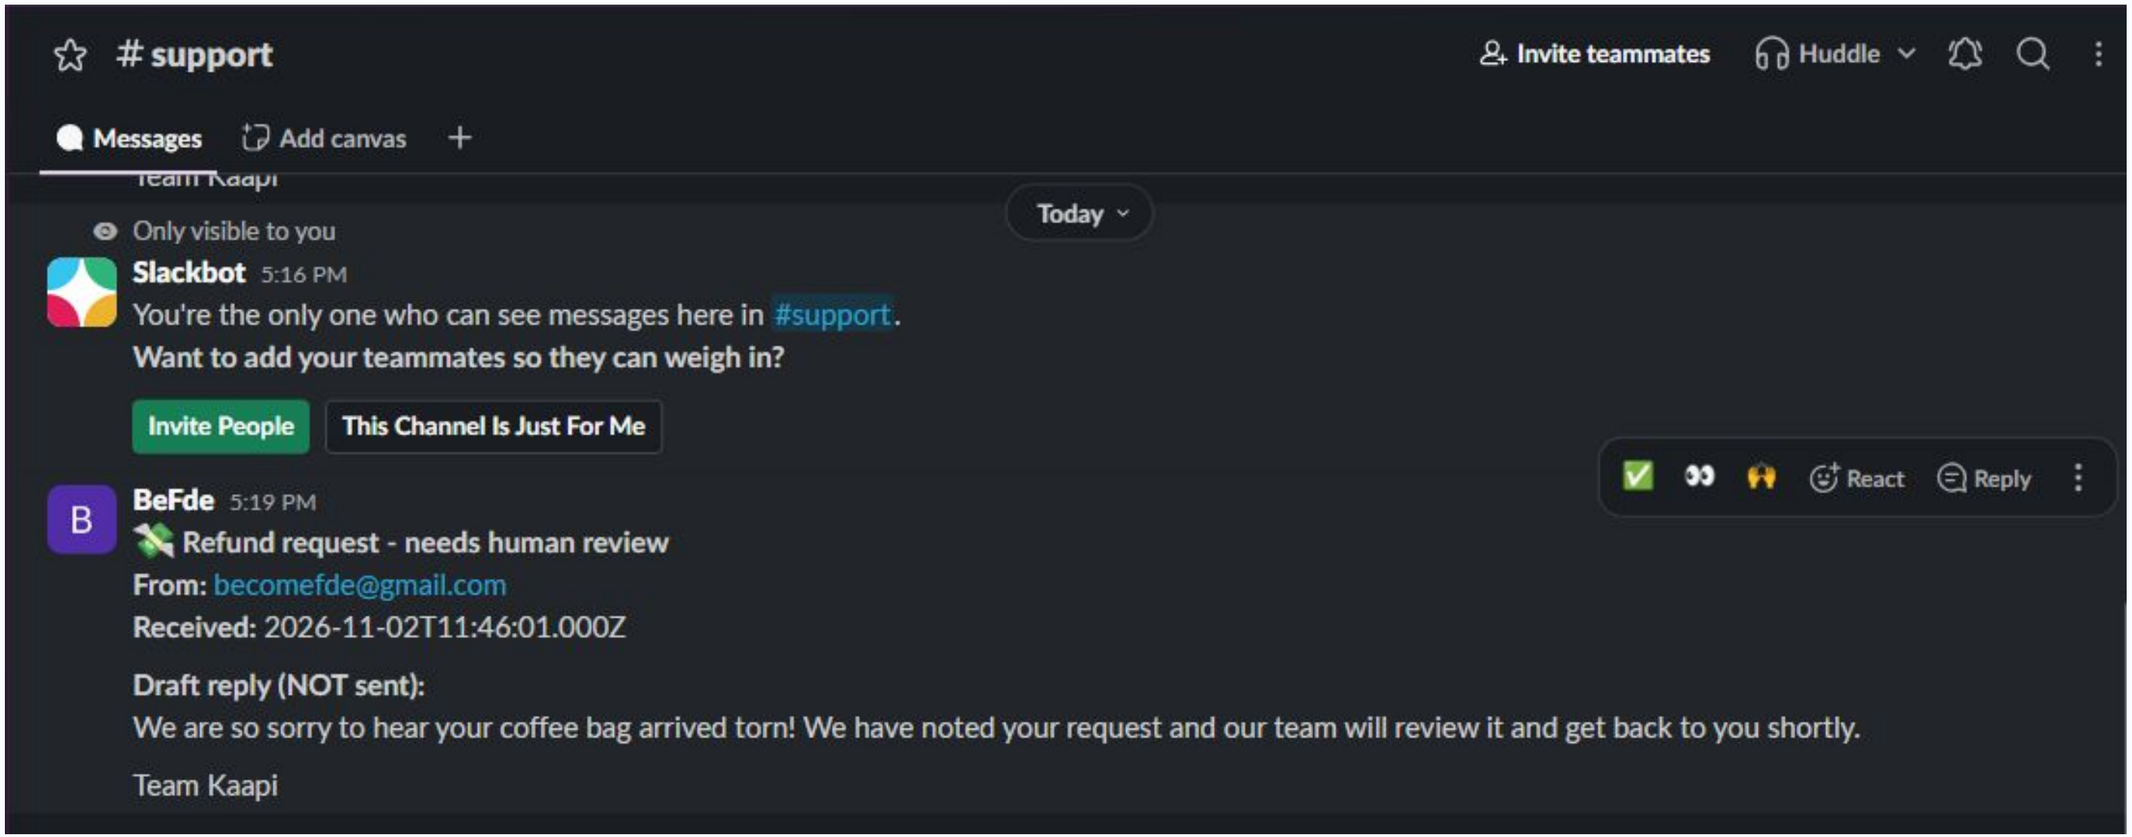

Send a Slack review alert

Other categories

Keep the Sheet row only

The condition routes the work. It does not issue a refund.

A person receives the handoff

A review alert, with the draft clearly marked NOT sent

Test all three routes

Input	Category	Expected result
Hi, order KC1042 arrived with a torn bag. I'd like a refund.	**refund**	Sheet row + Slack alert
Which grind should I use for a French press?	**product**	Sheet row only
Bhai mera order KC1055 abhi tak nahi aaya, kab tak aayega?	**delivery**	Sheet row only

The same task with two providers

Claude

"Please reply with a photo of the damaged bag to help us look into it faster."

Gemini

"We have noted your request and our team will review it and get back to you shortly."

Actual excerpts from the same earlier test / 2 November 2026

When a step does not work

Empty run?	Check the new unread email and subject filter.
Connection error?	Check the credential on the failing node.
Blank Sheet cells?	Check the document, tab and field mapping.
No refund alert?	Check the refund condition and Slack channel.

Your Day 1 handover

Your own working workflow

1. Three sample emails with the expected routes
2. A draft that stays within its boundaries
3. A template you can reuse for another process

Tomorrow: knowledge and tools

Company knowledge

Policies and FAQs through retrieval

Order tools

Look up an order. Check eligibility. Create a ticket.
